

# TrulinX<sup>®</sup>

a product of **Tribute**  
Software for Successful Distributors

**It's simple really,  
We know your business better!**

## **LOT CONTROL/SERIAL NUMBER TRACKING** SPECIALIZED FEATURES TO HELP YOUR BUSINESS

***Your business requires a sophisticated inventory management system - and that may include the ability to determine at a moment's notice which vendor provided you with a product, and which customer took delivery of a specific batch. TrulinX has that capability built into its inventory management system. No special workarounds or separate databases needed!***

With the TrulinX Lot/Serial Tracking system, you can make time-consuming tasks as simple as the click of a button. Our lot tracking system gives you the power and flexibility to comply with vendor and regulatory requirements while providing you with the tools to offer better service for your customers, vendors, and staff.

The Lot/Serial Number tracking system in TrulinX helps you manage important information from start to finish such as: lot assignment parameter, source, expiration date, lot, and batch quarantine. It's integrated from receiving to shipping and includes the following features:

- ***Full capability for entering, storing, inquiring, and reporting of serial numbered and lot numbered items. Individual items can be selectively designated as lotted and/or serialized.***
- ***Issue and Receipt Logic – Lower the cost of inventory by using a variety of Lot Assignment Methods at the system or Item Control level by the following parameters –***
  - ***FIFO – First In, First Out, picks from the oldest in the system until quantity is fulfilled***
  - ***FIFO Complete – Searches for the oldest lot numbers several ways to find the best fit.***
  - ***Lot Complete – Searches from the newest lot to the oldest.***
  - ***Manual – Ability to enter Lot and Quantity used manually during shipment.***
  - ***Required Lot Assignment – Ability to force users to assign lot numbers to exact quantity received, shipped or adjusted.***

- ***Flexible Bin Location Management & Pick Ticket Lot Assignment – Lot Number records can be manually created, adjusted and/or deleted.***
- ***Lot Control Inquiry Screen – Inventory can be filtered based on whether item is Lot Tracked. Users can easily find out which Lot Numbers were received for an Item or were shipped on a specific pick ticket.***
- ***Lot Control Pick Ticket Report and Item Put-Away Report***

### **Lot Control Inquiry**

Improve customer service, save time, and increase efficiency by the ability to automatically view the various lots from Quote/Order Entry while on the phone with a customer to ensure you can serve them.

### **Receipt Line Assignment Process**

Give your warehouse staff the ability to track lots based on PO Receipt lines and enter vital information such as the various lengths on the reel of hose or tubing, thereby giving Customer Service real-time information. You will have the ability to allocate a receipt line to one or more lots or do partial allocations and assign the rest at a later time.

### **Pick Ticket Process / Bin Location Processing**

Streamline your Warehouse operations with the ability to generate a Lot Pick Ticket Report that will tell you in what Bin Location(s) the Lot(s) are located.

### **Traceability**

Protect your assets by having complete visibility into the activity of each lot. With a click of a button, know where it came from, where it is located in your warehouse to where it was shipped...

***Tribute solutions for hose, tubing, sealing, gasketing and related distributors. We're designed around your business processes and focused on your success!***
