We know your business better!

EDI INTEGRATION

SPECIALIZED FEATURES TO HELP YOUR BUSINESS

TrulinX is integrated with Pro EDI to offer an integrated Electronic Data Interchange solution, allowing users to seamlessly comply with trading partner requirements.

In most of today's manufacturing and distribution markets, EDI is the standard operating procedure for processing purchase orders (POs), advanced shipping notices (ASNs), invoices, and other supply chain transactions.

Tribute has partnered with Pro EDI by Encomium Data International, Inc., a leading EDI provider, to offer Tribute customers a more comprehensive approach to leveraging the power of electronic data interchange.

Pro EDI is an EDI translation and document management software system designed to add EDI capability to existing application environments. Pro EDI was designed to run in an unattended mode and is easily integrated into your daily operations with simple BAT files. Pro EDI allows you to expand your communications without added cost. Supporting both ANSI and EDIFACT standards, Pro EDI lets you compete globally.

TrulinX EDI integration with Pro EDI reduces or eliminates the need to manually enter data between two systems, saving time and reducing errors – and reducing your operating costs.

EDI integration with TrulinX can also save you money by helping to eliminate "chargeback" penalties that trading partners can impose for problems related to EDI documents such as keying errors, missing data or failure to meet time limits on supply chain tasks.

The following transaction sets are supported by TrulinX:

- 810 Inbound Invoicing
- 810 Outbound Invoicing
- 850 Inbound PO
- 850 Outbound PO
- 855 Inbound PO Acknowledgement
- 855 Outbound PO Acknowledgement
- 856 Outbound Advanced Shipping Notification

Gain the ability to communicate electronically with a wide range of trading partners:

Some of the wide variety of trading partners our customers have utilized EDI to communicate with: 3M, Aeroquip, Allen-Bradley, Bimba, Bosch Rexroth, Caterpillar, Chrysler, Denison, Exxon Mobile, Fastenal, Gates, Goodyear, Harley Davidson, John Deere, Ingersoll Rand, Kohler, MAC Valves, Michelin, Mitsubishi, Norgren, Numatics, PHD, Parker, SMC, Sun Hydraulics, Tyco, Vickers, and Volvo, among others.

Internet EDI Van Services: EasyLink

Pro EDI's internet EDI VAN solution, EasyLink, will have your EDI deliveries up and running as quickly and painlessly as possible. Using the flexibility of the internet, you will be able to connect to any of your trading partners, regardless of what connectivity method they require. EasyLink can satisfy your trading partner's environment to connect via EDI INT via AS2 without purchasing additional software.

Pro EDI's standard pricing for EasyLink is a \$35 monthly access fee and 12 cents per kilo character per interchange. There is no charge for the setup of trading partners that use a traditional VAN service. There are no inter-connect fees, no message fees, no peak vs. off peak rates and no long term contracts. Pro EDI also offers a volume discount, so if you process more than 4000 kilo characters per month, your cost per kilo-character will decline at multiple tiers.

If you run on a Windows platform, you will receive free encryption software that will secure your data when sending and receiving files over the internet. They will also provide you with a sample script file that will allow you to execute the send and receive commands in a batch mode.
